
Dan,

Trying again--

Catherine

Hi Dan,

Thanks for your message. I will correct the language on the message regarding the workshop. It's not quite clear to me from the session description what the expected/desired outcome is - are you looking to get/exchange information only, or is the group going to help frame the course for DoD treatment technology work in the future (based on the forthcoming funding targeted to that issue)? If the primary purpose is to provide the information on what's going on with treatment technology, you wouldn't need to built in a lot of time on the agenda for participants to ask questions, bring up their own issues etc. If you are trying to put together a list of potential areas to be funded, or somehow prioritize activities - you would probably get to that destination using a different road (so to speak). If you want to discuss format/possible agendas in more detail let me know, and I would be happy to discuss.

Please let me know if you have any questions.

Thanks,
Catherine

Subject: Re: Catherine's Point of View

Larry,

Catherine is correct. I never indicated this was an IPSC sponsored event and apologize if there was any confusion. The treatment technology discussion in San Antonio is a DoD sponsored event offered through AFCEE.

I'll give you a call tomorrow in the hopes of straightening things out better!

Dan
